

# eVOLV<sup>CS</sup> e-Signatures

In Evolv-CS agencies can capture and assign approval signatures from Staff, Clients and Parents/Guardians through stored image files, or use an electronic signature pad to enter them directly on the desired form in seconds.

## Ensures Document Integrity

Clients, staff and others can easily place their signature on a desired form. Placing a signature on a form “locks” the document - meaning no changes can be made without the approval of the signer.

## Easy To Use

Simply plug in the electronic signature pad and start signing! All the necessary software and support is built right into Evolv-CS for seamless integration without extra support fees.

## Flexible

A signature capture field can be added to virtually any form on the system using Defran's User Tools, including Consent Forms and Treatment/Service Plans.

## Visible Approvals

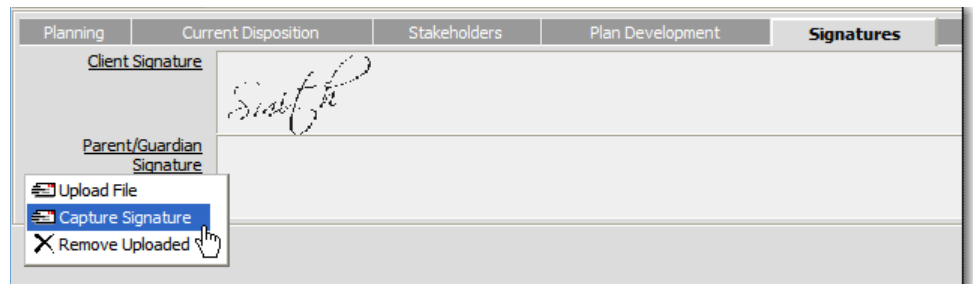

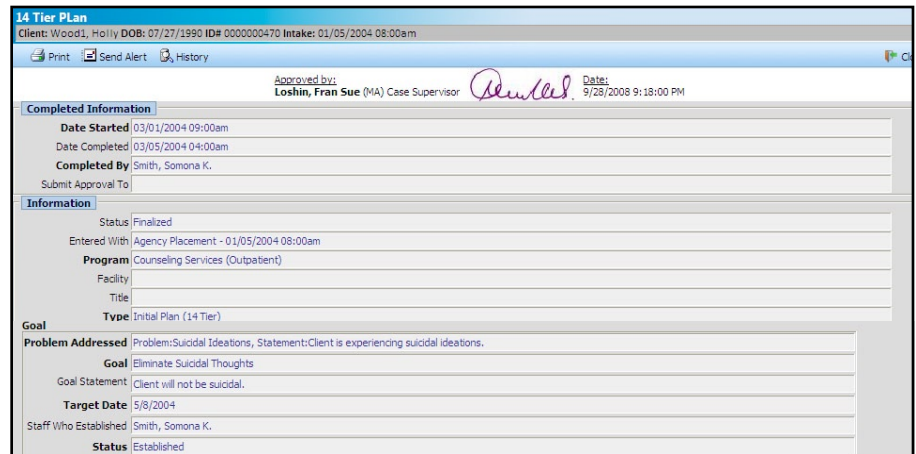

Staff approval signatures appear on the form header, along with the date and time of the signature.

## Maintains Historical Records

Staff signature history is automatically captured and stored, for easy look-up of past titles, credentials, etc.

## Low-Cost Solution

The Topaz Systems T-L460-HSB-R is lightweight, durable and very affordable. Each unit comes with 1 year extendable warranty. All software support is provided absolutely free of charge. These inexpensive electronic signature pads improve workflow efficiency and allow for the complete elimination of mailing, scanning storage, filing, copying and retrieval of paper documents.

## Versatile Technology

SigPlus technology allows the user to create, view and validate signatures in Word, Excel and PDF documents quickly and easily.
